L18: Entry 2 of 14

DOCUMENT-IDENTIFIER: US 5660663 A

TITLE: Marking tag

YEAR ISSUED (ORACLE) (1):
1997

Brief Summary Paragraph Right (2):

This invention generally relates to a marking tag for being applied to an item for a variety of reasons, such as for the display of information relating to that particular item. Marking tags of this kind can typically be supplied to a commercial establishment in the form of a roll having a large number of consecutively disposed, separable marking tags. The marking tags can be individually removed from the roll and applied to the desired item to be marked. Such tags commonly have at least one surface for the display of information thereon relating to the particular product, i.e., product name, manufacturer, use or care instructions, price, etc. Labels or tags of this type are generally used by retail stores for marking of the goods available for sale. The tags are also generally configured with an arrangement for fastening the tags to an object, or can sometimes simply be sewed on, or possibly stapled or pinned, when the object has at least a fabric portion.

☐ Generate Collection   ☐ Print

DOCUMENT-IDENTIFIER: US 5946289 A

TITLE: Method and system for a shipping and playing adapter to enable a reduced size CD to play in a full-sized CD player

Detailed Description Paragraph Right (5):

As shown in FIG. 4B, the CD 18 is attached to the adapter 10 such that the fold line 16 remains exposed. The CD 18 is attached with a read/write side 20 facing away from the adapter 10. Although not shown, it is to be understood that the CD 18 may be attached to the same side of the adapter 10 as the fold line 16. Since CD's typically have a label on the side opposite the read/write side that includes such things as the product name, loading instructions, ownership rights, advertising, etc., it may be desirable to provide the same information on the adapter 10 so that an end user may still see such information once the CD is attached.

L10: Entry 1 of 1   File: USPT   Sep 28, 1999

DOCUMENT-IDENTIFIER: US 5957695 A
TITLE: Structure and method for displaying commercials and sending purchase orders
by computer

YEAR ISSUED (ORACLE) (1):
1999

CLAIMS:

28. The computer readable storage media of claim 20 wherein said software when
executed causes said computer to display detailed information advertised in said
commercial, wherein said detailed information is about a product or service.

29. The computer readable storage media of claim 20 being further encoded with a
price advertised in said commercial, wherein said software when executed causes said
computer to display said price and wherein said price is of a product or service.

30. The computer readable storage media of claim 20 being further encoded with a
shop advertised in said commercial, wherein said software when executed causes said
computer to display said shop and wherein said shop is for a product or service.
